"This knowledge is miraculous"

Caroline,

The work that you and Dr. Hamer are doing is amazing, and has had a very positive affect on my life. I used to get a serious cold or flu several times a year, and suffered from various allergies. Since I started reading about German New Medicine over a year ago, all of those problems have almost completely ceased. Thank you so much for these discoveries. I pray that many more people in the world will learn about them.

Over the course of the last few years, I started noticing a reoccurring small **skin rash** next to my right nipple that would last for months at a time. I am left handed. I also am an aspiring playwright. I couldn't understand the cause of the rash, until I had a sudden epiphany: The rash was present whenever I was working on a play, and absent whenever I wasn't! I realized that the finished version of the play, which existed only in my imagination, until I finished writing, was like a child that I felt separated from. Since I am left-handed, this separation occurs on my right side. When I had this realization I was working on a play that I have since finished. Sure enough, upon completion of that play, the rash disappeared. I wonder if other writers have had this experience? I once heard that Ayn Rand, when she was writing *Atlas Shrugged* would tell her friends that she was "with book" (a play on the expression that a pregnant woman is "with child").

This is a second example of GNM aiding my life: Over a substantial part of last year I began having **muscle** pain in my jaw. I assumed that I had given myself TMJ from chewing gum, or biting my nails. So, I discontinued those activities, but the pain continued unabated. Then, a few months ago, I realized that my tendency to sometimes mumble was causing me to devalue my ability to communicate verbally. Literally, since the very day I had this realization, my jaw has been pain free! Like I said, this knowledge is miraculous.

Thank you again for this miraculous knowledge that you are sharing with the world.

Nick Moore

****Comments:** When Nick was working on the play he was in the healing phase (this is when the skin rash appears); when he was not working on the play he was in the conflict-phase, thus no rash.

***This is an example that shows that the awareness of the conflict can cancel the “tracks” that are associated with the conflict immediately, and healing can be complete.
